

4.11 S2 NetBox® Software Version 4.11 for S2 NetBox and S2 NetBox VR Series Products

S2 NetBox Software Version 4.11 introduces Microsoft Active Directory support, expanded integration with Mercury Security panels and other updates.

Active Directory Support

Support for up to 10 Microsoft Active Directory connections directly between S2 NetBox and the Active Directory server allows users to address standard IT compliance policies and minimize duplicate data entry tasks.

- Seamlessly populate or update person records without having to access S2 NetBox
- Map Active Directory security groups to access levels and map person fields to Active Directory fields
- Support up to 10 data synchronization configurations for each Active Directory server

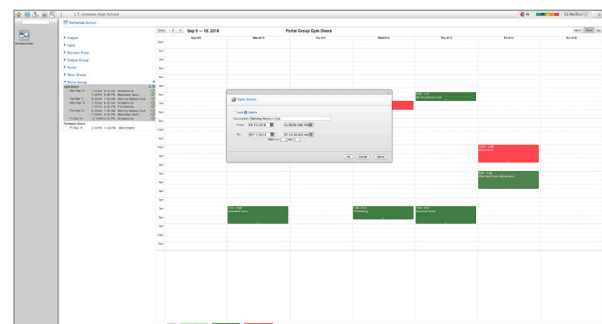

Version 4.11 adds support for up to 10 Microsoft Active Directory connections.

Expanded Mercury Security Integration

Version 4.11 enables additional Mercury Security panel features to be accessed and used from S2 NetBox.

- Allow authorized users to double tap a reader to override a time spec
- Support scheduled actions for Portal Groups associated with Mercury panels
- Support alternate readers for elevators associated with Mercury panels

Scheduled Actions are now supported for Portal Groups associated with Mercury panels.

Other Updates

User Role Permissions for Reports: Any S2 NetBox user role can now be assigned access to view and edit reports.

Enhanced Page Styling: Styling for the Readers, Reader Groups and Elevators pages has been updated.

Version 4.11 supports S2 NetVR® and S2 NetBox VR Version 1.9.2. This document describes only some of the release's capabilities.

The following S2 hardware is eligible for upgrade to Version 4.11:

- S2 NetBox Enterprise 50/100
- S2 Enterprise Ultra/Select
- S2 NetBox with N2800 processor
- S2 NetBox Extreme with N2800 processor
- S2 NetBox VR
- S2 NetBox VR Quatro

If you have traditional S2 hardware that is not listed here or are not sure how to identify your hardware, please log in to Support Central and view the **S2 *Forward!* Traditional Hardware Identifier** on any S2 NetBox Series Support Page.
